

Hosting & Data Residency Confirmation

Document: Hosting Environment & Data Residency **Service Provider:** AL MERAK TAX CONSULTANT L.L.C (E-Numerak) **Date:** 2026-06-23

ACTION REQUIRED — confirm/complete the [PLACEHOLDER] items below with your hosting provider before submission. UAE e-invoicing accreditation may require invoice data to be stored within the UAE; verify your server region.

1. Hosting environment

Item	Detail
Provider	[PLACEHOLDER — e.g. Hostinger / AWS / local UAE DC]
Region / Data centre	[PLACEHOLDER — confirm UAE region if required]
Server	Linux VPS (Ubuntu 24.04 LTS), Docker-based deployment
Public services	HTTPS (443) and HTTP→HTTPS redirect (80) only
Domains	e-numerak.com (app), api.e-numerak.com (API), smp.e-numerak.com (SMP)

2. Architecture (containers)

- **nginx** — TLS termination + reverse proxy
- **backend** — Django REST API (Gunicorn)
- **frontend** — Next.js application
- **PostgreSQL** — primary database (invoices, customers, audit)
- **Redis** — cache / task queue
- **Celery worker + beat** — background tasks (cert monitoring, TDD)
- **phoss-SMP** — Service Metadata Publisher (localhost-bound)

3. Data residency

- All invoice data, customer records, and uploaded documents are stored on the hosting environment above and on a **persistent storage volume** (media_files) on the same host.
- Uploaded media (logos, TRN documents, generated XML/PDF) is **not** sent to any third-party storage by default (S3 is optional and currently disabled).
- **Data residency confirmation:** [PLACEHOLDER — state that production data is hosted within the UAE, or describe the compliant arrangement / region.]

4. Network & access security (in place)

Control	Status
OS firewall (ufw) — only 22/80/443 open	✓ Active
Brute-force protection (fail2ban)	✓ Active
Malware scanning (ClamAV, weekly)	✓ Active
Resource monitoring (Netdata)	✓ Active
TLS (HTTPS) on all public endpoints	✓ Active
Email authentication (SPF, DKIM, DMARC)	✓ Active

5. Encryption

- **In transit:** TLS (HTTPS); PEPPOL payloads additionally signed (RSA-SHA256) and encrypted (AES-128-GCM + RSA-OAEP) at the message level.
- **At rest:** database and uploaded documents reside on the host volume; **[PLACEHOLDER — note disk encryption if enabled by the provider.]**

Confirmation: We confirm the platform is hosted and operated as described above, and that production invoice data residency complies with applicable UAE requirements. *(Sign + date on submission.)*
